News Release

Verdant acquires 24Tech Corporation to enhance information integration between energy technologies.

LOS ANGELES, September 5, 2012 – VRDT Corporation (“Verdant”) announced today that it has completed its acquisition of 24Tech Corporation (“24Tech”), an information technology (“IT”) integration company. The move creates an internal information nerve center for Verdant and better facilitates the flow of that information not only within the various existing divisions within the company, but also to and from Verdant’s strategic partners and acquisition targets across the globe.

“24Tech has an extremely loyal customer base and a healthy revenue stream,” stated Graham Norton-Standen, Verdant’s Executive Chairman. “This move makes sound business sense to us at Verdant on 2 fronts: we get to continue to utilize the expertise of 24Tech’s team, only now on an internal basis, while at the same time we believe that, as part of the Verdant family of companies, we can help it expand into new markets to further enhance its profitability.”

“We have had a long-standing relationship with Verdant and have always believed in its vision,” said 24Tech’s President, Monte Winegar, “we are excited to be participating directly in achieving that vision as part of the Verdant family, expanding our reach, and continuing our relationship with our existing client base without missing a beat.”
